Intensive treatment of waste
effluents and conversion into
useful sustainable outputs: biogas,
nutrients and water.

PRESS RELEASE

AMIU GENOVA HOSTS THE EUROPEAN DELEGATION OF THE LIFE INFUSION PROJECT

Genova, October 24, 2024 - AMIU Genova is hosting the European delegation of the Life INFUSION project in Genoa, organizing an Open Day on Wednesday, October 30, titled "Technology and Innovation for a Circular Economy: Sustainable Solutions in Action in Europe."

The Life INFUSION project, funded by the European Union under the LIFE program, aims to develop innovative solutions for sustainable waste management, focusing in particular on wastewater treatment. The project seeks to reduce environmental impact and promote the circular economy by transforming waste into new resources.

AMIU Genova, along with the other project partners, is committed to the transfer and sharing of knowledge and innovative technologies. In this context, the open day to be held on Wednesday, October 30, 2024, in Genoa will provide an opportunity to discuss the results achieved so far and promote the exchange of best practices among the involved entities.

The day will be divided into two main parts: in the morning, project partners and stakeholders will visit the Monte Scarpino site, where they will have the chance to observe AMIU's innovative technologies for leachate management and biogas energy production. The afternoon will be dedicated to a workshop (held in English) consisting of two sessions of presentations at the multimedia space of the Surpluse Center in Via Bologna, with both European and local speakers (see attached program).

Giovanni Battista Raggi, president of AMIU Genova, emphasized the importance of this initiative: "We are proud to be part of the Life inFusion project, and the workshop on October 30 will be a valuable opportunity to discuss new technologies and operational models that can truly make a difference for our region and for all of Europe."

The event will be streamed online, and to participate remotely, simply register at this link: <https://lnkd.in/duRyJu-Z>.

Further details about the project can be found at this link: <https://lifeinfusion.eu/>
